Name: Patient A

🔊 Right Ear

Enter known datapoints that will help create the curve

Level (dBHL)	Score %

Best bone-conduction threshold*:

**Used for calculating cross hearing if masking not applied when testing the left ear*

PI Max (right):

90dBHL Score (right):

% score variability from best fit line: 0%

🔊 Left Ear

Enter known datapoints that will help create the curve

Level (dBHL)	Score %

Best bone-conduction threshold*:

**Used for calculating cross hearing if masking not applied when testing the right ear*

PI Max (left):

90dBHL Score (left):

% score variability from best fit line: 0%
